⤴ **Eazyview**
Pipe and Drain Camera

Driven by requests from customers for low cost pipe inspection, Eazyview – the UK specialist designer and manufacturer of inspection solutions – is officially launching two new attachments that expand the range of uses for its best-selling Tradesman camera.

The first attachment is a highly cost-effective pipe and drain camera attachment that works with the Tradesman handset and comes with a

20m flexible fibreglass pipe and super-sensitive wide-angle camera head. The combination creates a powerful inspection system suitable for drains, pipes, flues, vents, ducting and any large voids.

The wide angle camera ensures that the walls of pipes and vents can easily be seen allowing detection of damage, corrosion, collapse or root ingress. The super-sensitive low light camera uses just four LEDs and requires no extra power, using just the batteries in the Eazyview handset. The attachment is lightweight,

portable and easy to clean.

The Eazyview pipe and drain camera system avoids the time and cost of hiring specialist contractors and allows the user to make a quick and easy assessment of a situation. It is priced such that it will pay for itself in one or two jobs and is a powerful tool for builders, plumbing and drainage specialists, electricians, HVAC engineers, schools and colleges, FM companies and anyone involved in property maintenance and inspection.

» **Illbruck**
SP050 Universal Sealant

Designed for both sticking and sealing interior and exterior fittings, components and panels, the new SP050 Fix and Seal Universal from illbruck is a great all-in-one product for professional tradesmen.

Whether it's a mirror, door threshold, skirting board or dado rail which needs fixing and sealing before painting, SP050 is a time-saver as this product does both jobs, and ensures a perfect finish with its superior bonding and tooling properties.

Offering high bond strength and excellent weather resistance, the single-component adhesive utilises illbruck's advanced SP polymer technology to achieve excellent adhesion to a variety of substrates, including metal, glass, PVC, polymers, ceramic, concrete and different types of masonry.

» **Coltraco Ultrasonics**
Portagauge 4

Adding to the successful single-echo Portable Ultrasonic Thickness Gauge Portagauge 3, Coltraco Ultrasonics is excited to announce the release of the Portagauge 4.

The multiple echo Portagauge 4 offers unparalleled accuracy in taking metal-only corrosion readings. The Portagauge 4 is precise, offering accuracy to $\pm 0.1\text{mm}$ and is able to ignore surface coatings such as paint. With easy calibration and no zero-ing required, the unit is ideal for effective and efficient thickness gauging applications, on-board ships by marine superintendents. The large colour LCD Numeric Digital Display and the soft moulded rubber casing makes the Portagauge 4 robust and user-friendly. The variety of sensor options and underwater variants offered by the Portagauge 3 and 4 range, means that they can easily be adapted to a variety of different safety roles and requirements.

» **Sylvania**
ToLEDo Retro Range

Creating a vintage inspired design with the latest, most efficient technology is now possible thanks to the innovative ToLEDo Retro from Sylvania. The range has recently been expanded to include MagmaGlow and Candlelight versions as well as the award-winning SylCone Retro. These new unique lamps are the perfect choice to create mood lighting in a range of applications including hospitality, retail and residential and are all available in the Sylvania EVO range.

The ToLEDo Retro range truly replicates the look and feel of traditional incandescent lamps and includes 76 models with 32 dimmable and 44 non-dimmable. Available in GLS, Candle, Ball, ST64 and Globe shapes, the ToLEDo Retro lamps now offer a comprehensive range of colour temperatures – MagmaGlow (1,700K), Candlelight (2,200K and 2,400K) and Homelight (2,700K) – to create the perfect setting in any environment.
